TabPFN v2
TabICLv2
Kumo-Tabular
TabPFN v3.5
raw
after $p/\hat{\pi}$ correction
(a) Coverage model
TabPFN v3.5, DEV study
$y = x$
$m = 3$
$m = 1$
observed macro-F1 gap
predicted from coverage alone
(b) Majority upweighted
(c) Minority upweighted
macro-F1 change from $s = 0.5$
share s of that class
